**Prospect Mapping for Radius Search**

1. In the Prospects functional area, click Mapping.

2. Click the Add button and choose *Constituent*.
3. **Search and select the constituent in GAIL**

![Constituent Search](image1)

4. **Hover over the Pushpin and select Radius search**

![Mapping](image2)
5. Select or enter how far you’d like to search then click ok

6. Use the zoom feature to click on the constituent records (Pushpins) to narrow down your search, or start a driving route
