SCHOOL OF MEDICINE

In the University of Georgia's ongoing mission to serve our state, UGA is establishing a new independent School of Medicine in Athens to directly address Georgia's critical need for doctors.

With UGA's strong biomedical research enterprise and deep connections to Georgia communities from the Appalachian Plateau to the Coastal Empire, the UGA School of Medicine will dramatically and permanently enhance our university, our communities and our state.

UGA is uniquely positioned and ready to address the healthcare challenges of our state. We need your investment in the UGA School of Medicine to build a state-of-the-art facility to train Bulldogs who will ensure a healthier Georgia.

Our current infrastructure can support 72 students per class. With this new facility, the School of Medicine can grow that enrollment to 120 and provide cutting-edge research and instructional spaces to fill Georgia's need and capitalize on our opportunity.

The need

40th IN PHYSICIAN TO
POPULATION RATIO
among all U.S. states

9 GEORGIA COUNTIES
HAVE NO DOCTOR

**NEARLY
1/3** OF GEORGIA
PHYSICIANS
ARE 60 OR OLDER

The opportunity

9th HIGHEST PRODUCER OF
OF MED SCHOOL APPLICANTS
*according to the Association of
American Medical Colleges*

159 GEORGIA COUNTIES
HAVE A UGA PRESENCE

1 RECIPIENT OF NIH FUNDING
*among U.S. public universities
without a medical school*

Thanks to generous support from the state of Georgia, the UGA Foundation, and the UGA Research Foundation, our fundraising goal for the School of Medicine's \$100 million facility is

\$25M
